

**Experience
a new supply
mode with
bimat**

Our focus:

**Concrete, precast concrete,
aerated block, thermal
insulation, paving tiles**

Let's be honest:

You have
overspending

and this is not "just a one-time
thing". This is a systemic problem

Your P&L
has no lines:

"Chaos"

"Logistical failures"

"Micromanagement"

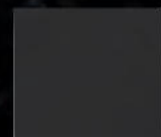

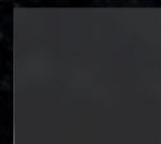

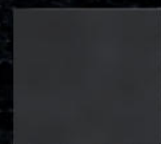

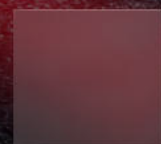

***But it is exactly
these that burn***

up to

15%

your margin

Any manufacturer will sell you material

None will manage
your supply

**The approach "1 product
= 1 supplier" slows down
construction**

They multiply documents
and disrupt logistics

**The illusion of the
lowest price**

Savings on price instantly
burn out due to crew
downtime and
emergency logistics

bimat cuts overspending

by changing the essence of supply:

***Not the unit price
of material, but
the efficiency of
the entire chain***

Why bimat?

We take the entire chain upon ourselves

Instead of a dozen contacts
— one partner and one
responsibility.

We offer a favorable wholesale price

Because we aggregate
orders from hundreds of
clients

We cut emergency overspending

We reserve material and
delivery in advance

We work without "translators"

We speak the same
language with the foreman:
building codes, standards,
EN

No bureaucratic pauses

Received specification —
instantly launched logistics

We built this market

**Now we *manage*
supplies on it. For more
than 350 companies!**

We grew from the ASTOR concrete plant network, built from scratch and sold to the global giant CRH (Ireland)

Left a strong team and expertise

We understand the physics of materials and the backstage of manufacturers

It's impossible to sell us a "logistical fairy tale"

We act as *your* *external* supply department

Input data *Check point 01*

Send PDFs, drawings photos, or Excel with errors.
We will translate to the manufacturer's language.

Settings *Check point 02*

We get to the core. Agree on specifications and recipes

Start *Check point 03*

We synchronize participants: manufacturer → logistics → site

Final documents *Check point 04*

Accounting won't bother you. Invoices, bills, quality certificates will be with you before project completion

We conducted a full
market check-up

**You receive
only verified
resources**

Concrete

From ASTOR

Precast concrete

From KOVALSKA

Aerated block

From PORISTONE

Thermal insulation

From IZOVAT &
SWEETONDALE

Tiles

From UNILUX & KOVALSKA

Stop overspending – **activate bimat**

One partner. One contract.
Zero excuses.
